

Roforks rotating forks for your Manitou telehandler

Meet the **Roforks** rotating forks, which are specially designed to work in harmony with your rotating telehandler.

With a **Roforks** jobs can be carried out more efficiently because less manoeuvring room and work space are required, resulting in substantial cost reductions as well as saving huge amounts of time.

The long list of jobs that the **Roforks** can do includes unloading pallets and stacking them on another parallel situated vehicle.

The **Roforks** is TÜV tested and approved.

In addition, the **Roforks** has CE-certification and is supplied with a declaration of conformity in accordance Annex 2 of the Machinery Directive (98/37/EC).
